FLOOR DEBATE

March 16, 2004 LB 916

further out you have to go to spread the manure. And so these regulations kind of, depending on your geographic area,...

SENATOR CUDABACK: One minute.

SENATOR BEUTLER: ...represent a kind of limitation on the size of operation that's based upon their ability to distribute out the waste in a way that doesn't jeopardize the environment. Well, I've only had a chance to read to you one of the nine things that management plans are ensured to do, but, Senator Chambers, number two, and I'll go on to the rest of them later, but number two is proper management of mortalities--dead animals--to ensure that they are not disposed of in a liquid manure, storm water or process wastewater storage, or treatment systems that is not...or a treatment system that is not specifically designed to treat animal mortalities. So it says not disposed of in a liquid manure, storm water, or process wastewater storage. I suppose...

SENATOR CUDABACK: Time.

SENATOR BEUTLER: ...does that mean...

SENATOR CUDABACK: Thank you, Senator Beutler. Senator Schrock, on the Preister amendment.

SENATOR SCHROCK: Mr. President, members of the Legislature, I'm going to respectfully oppose the amendment. I think what I will tell you is that what Senator Preister is trying to do is already in the bill. We have a little trouble with the word "continuously" and "annually." Right now, the operators shall file and if there's any changes in their nutrient management plan then they have to update. They don't have to annually update. Why should we have to annually update a plan that we're not changing? So the language is troubling. I'm not quite sure why, but DEQ says this has the potential to include small operators who are now exempt. If you're under 1,000 animal units and you're not...and you're not a potential to discharge to the waters of the state, you don't have to have a permit. I have made an offer to Senator Preister. I will sit down with him and all parties concerned between now and Select File and
